Introducing the Delta HLA Plus

Experience the edge of innovation with the Delta HLA Plus, a sleek and dependable high-water level alarm, perfectly engineered for real-time monitoring of pumping stations.

The Delta HLA Plus is dedicated to safeguarding your property, offering live, in-depth data on all pumping station activities. It's not just about monitoring; it's about proactively reducing risks.

Adaptable and intelligent, the Delta HLA Plus is ideal for managing ground and surface water pumping stations.

The Delta HLA Plus, a high-water level alarm, is designed with the purpose of ensuring your peace of mind, regardless of your location. It provides real-time alerts for any significant shifts in your basement drainage system.

This **SMART** device allows intelligent monitoring and maintenance, reducing the chances of mechanical failure. By leveraging advanced technology, the Delta HLA Plus serves both a proactive and preventive role, ensuring optimal functioning of your pumping station.

Suitable for ground, surface and storm water.

The Delta HLA Plus is equipped with distinctive monitoring software that gathers crucial data on packaged pumping systems, a vital component of a Type C Cavity Drain Waterproofing Solution.

The Delta HLA Plus promptly identifies any critical alarm conditions, allowing swift action in case of mechanical breakdowns. This device comes with standard features like immediate notifications, real-time monitoring, and live performance data of pumping systems. All these features are readily available and free on all Delta HLA Plus devices.

Features and benefits

Smart protection for pumping stations

Real time notifications – any device, anywhere, any time

Monitors pump station activities

Tracks and records

Instant access to pump station activity via the Delta Pumps App

Indicates changes in pump activity (frequency and duration)

Linked pumping stations

WiFi or LAN/Ethernet connection

Service due reminders

All keyholders receive alerts via email and push notifications

Subscription-free Delta Pumps App

THE DELTA APP

The Delta Pumps App offers peace of mind at the touch of a button. Always know what's happening with your basement drainage system, day, or night.

Our innovative new application. It's designed with cutting-edge technology to optimise your user experience and meet your basement drainage needs efficiently. This application stands out as a game-changer in the tech landscape, offering unique features and functionality.

You'll know what's activating as it happens.

The Delta Pumps App promises to provide seamless navigation, user-friendly interfaces, and a wealth of features designed to safeguard your pumping stations, peace of mind is just a tap away. Activate your keyholder notifications on the app and receive instant alertifications to any registered device.

The Delta HLA Plus, when integrated with any pumping station, offers a variety of SMART features to optimise pump efficiency. This delivers optimal performance to homeowners and contractors.

By registering the Delta HLA Plus on the Delta Pumps App, users gain access to a real-time analysis of their pumping stations. This allows for prompt detection and resolution of service, maintenance, or repair needs. Moreover, the Delta HLA Plus offers live data on pump station activity. For those unfamiliar with apps, these are software applications designed for use on a variety of electronic devices, including smartphones, computers, and tablets.

The Delta Pumps App is an internet-dependent, web-based app that stores all pump station data online. This web-based feature helps conserve memory space on your Delta HLA Plus device.

Every Delta HLA Plus device comes with a unique QR code, located on the device packaging and the device side panel.

All first-time users must register.

By consolidating multiple devices on a single platform, users can enjoy significant support, security, and cost benefits.

Installers or service partners can manage multiple devices under one user interface.

LINKED DEVICES

The Delta HLA Plus, an advanced high-water level alarm system, specifically designed for real-time tracking and monitoring of pumping stations, providing a reliable tool in your hands.

This sophisticated piece of technology offers a unique blend of performance and dependability.

The Delta HLA Plus is committed to protecting your property by providing real-time, comprehensive data on all activities of your pumping stations. It goes beyond mere monitoring by significantly mitigating potential hazards.

Connect every pump station under one roof seamlessly to the Delta Pumps App interface. Manage and control all your pump stations from one central location, enhancing your user experience and increasing efficiency.

KEY HOLDERS

Never miss an activation. Choosing keyholders is a crucial decision that is yours to make.

Property owners have the liberty to pick a single keyholder or multiple keyholders if you so desire. Select trusted individuals who will have access to your Delta HLA device.

Experience the edge of innovation with the Delta HLA Plus, a sleek and dependable high-water level alarm, perfectly engineered for real-time monitoring of pumping stations.

The Delta HLA Plus is dedicated to safeguarding your property, offering live, in-depth data on all pump station activities. It's not just about monitoring; it's about proactively reducing risks.

NO SUBSCRIPTION FEE

Experience the benefits of the HLA Plus without the burden of any subscription fees. Say goodbye to unnecessary costs and embrace the freedom that comes with zero financial commitments. Here is an opportunity to utilise a monitoring and notification service without any hidden charges.

Complete transparency, bringing an end to unexpected expenses.

DELTA HLA PLUS INTELLIGENT

Elevate your Delta HLA Plus device's monitoring capabilities with the Delta HLA Plus Level Float. This device enhances your Delta HLA Plus by providing comprehensive insights into your sump pump activities such as Frequency of Pump Activation(s), Duration of Activation(s), Fixed Depth(s), and Fixed Volume(s), adapting to the unique parameters of your pumping station.

Experience the transformation of your Delta HLA Plus from a 'Smart' High-Water Level Alarm to an 'Intelligent' High-Water Level Alarm.

The Delta HLA Plus Level Float is not just a device, it is your ally in proactive and preventive maintenance. It provides real-time analysis of your pumping station, enabling early detection and implementation of service, maintenance, or repair needs. The Delta HLA Plus Float is designed for seamless compatibility with all Delta HLA Plus devices.

Enjoy standard features such as instant notifications, real-time monitoring and live performance data of pumping stations.

These are available right out of the box and come free with all Delta HLA Plus devices. To unlock the full potential of the Delta HLA Plus Intelligent Pump Station Monitoring Device, simply register your devices on the Delta Pumps App at no cost.

FEATURES & BENEFITS

- A mechanically activated control switch offering additional features of Delta HLA Plus device
- Suitable for ground, surface and storm water applications
- Transforms Delta HLA Plus device from 'Smart' to 'Intelligent' monitoring system
- Enhances monitoring software via Delta Pumps App
- Real-time streamline log analysis of basement drainage system(s)
- Communicate faster during emergencies and other critical events
- Enhanced customer care
- A fully downloadable CSV history
- Delta Pumps App identifies multiple pump stations on one site

DELTA HLA PLUS - INSTALL NEW OR RETROFITTING

The Delta HLA Plus is a versatile product that can be integrated into any new projects requiring a pump station. It can be used alongside a Delta Type C Cavity Drained Protection System or function as a standalone unit in foul applications.

Moreover, it's a perfect solution for retrofitting existing pump stations due to its advanced technology and easy installation process.

Delta HLA Plus is an advanced monitoring high-water level alarm that offers top-notch protection for basement drainage systems. It provides real-time remote monitoring and notification services for pumping stations, ensuring pump stations are well protected and monitored.

The installation process of Delta HLA Plus is incredibly simple. It can be installed directly from the box as a replacement high-level alarm without the need for further modifications to existing basement drainage systems.

Once installed, users can connect the Delta HLA Plus to the Delta Pumps App to access full device features. The device's integrated monitoring software collects data on pumping stations and promptly detects critical alarm conditions, facilitating immediate action in case of mechanical failure.

Installing a Delta HLA Plus is an essential tool for maintaining an efficient and safe pumping station.
