

Description

Delta MS 20 Access Ports enables the 20mm cavity of the Delta MS 20 membrane to be inspected and flushed through should the need arise, making the whole cavity drained system maintainable and reducing long term risks. Ideal for inclusion with modular drainage.

Delta MS 20 Access Ports are supplied pre-fixed into a rectangular piece of Delta MS 20 Membrane which can be linked and sealed in the standard manner for Delta MS 20 Membrane. Delta Cornerstrip is recommended for a continuous waterproofing solution.

Where large floor areas are being covered or where modular sub floor drainage or perimeter channel and sub floor drainage are used then the inclusion of the MS 20 Access Ports ensures all aspects of the Type C System are maintainable.

Features

- For ease of cleaning, inspection, and maintenance of Delta MS 20 membrane floor cavity
- Compatible with Delta Basement Drainage Systems
- Compatible with Delta Type C Cavity Drained Protection Systems

Specification

- BS 8102:2022 Protection of below ground structures against water ingress. Code of practice
- NBS Specification R18 (Clause 310) Pumping Stations and Pressure Pipelines

Fields of Application

- Where large floor areas are being covered with Delta MS 20 membrane
- Modular sub-floor drainage
- Where a mix of channel and sub-floor drainage are intended to be used
- Essential part of a Type C Cavity Drained Protection system
- Essential part of a Basement Drainage System

Technical Drawing - DW-253-1-(C)

Associated Products

- Delta MS 20 Membrane
- Delta Cornerstrip
- Delta Basement Drainage
